(54) Title: HIGHLY OIL ABSORBING AMORPHOUS SILICA PARTICLES

(57) Abstract: The present invention relates to amorphous silica particles having high oil absorbance capabilities, a process for their preparation and use thereof. The amorphous silica particles of the invention, wherein oil absorption measured by JISK 6217-4 is more than 400 ml/100g can be obtained by baking at at least 200 to 990 °C.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
